Ducati Clutch Slave Cylinder

The Oberon Performance replacement clutch slave cylinder has been designed to improve the performance and the looks of the original Ducati cylinder. Substantially reducing the heaviness of the original clutch action, aching arms and clunky gear changes are a thing of the past. The internal piston design, seals and breather hole have been drastically enhanced to stop leaks and leave a smoother clutch action. CNC machined from billet for lightness, strength and precision looks. Six fantastic colours to choose from. Everything you need is included in the kit, plus a conversion shaft for earlier bikes. Fits current Ducati's including the 1098, 848 696, & Hypermotard.

- Smoother transition resulting in lighter clutch action.
- Six anodised colours
- Black, Blue, Gold, Red, Silver and hard anodised Titanium look
- CNC machined from billet aluminium
- Repositioned breather hole away from chain and sprocket grime
- 'U' seals for precision action
- Wiper seal to stop dirt ingress
- Shaft and dust sealed back
- Pre-2000 conversion shaft included
- Simple to install
- Stainless steel fasteners
- 1 year warranty
