

ITEM NO.	DESCRIPTION	QTY.
1	Main Body	1
2	Fuel Cap	1
3	Cap Base O-Ring	1
4	Cap Side O-Ring	1
5	Body to Tank Gasket	1
6	M5 x 8mm	4
7	M5 x 16mm	3

A direct replacement for Kawasaki models with 5 bolt head visible pattern on the original item 2007 >.

1. The fuel kit is supplied pre assembled and only requires simple fixing to the bike.
2. Remove the original assembly complete from the petrol tank.
3. Locate the Tank to Body to tank gasket seal (#5). Position the seal in the recess on the underside of the main body (#1). The petroleum jelly is there to temporary hold the seal in place whilst fitting.
4. Lightly screw the cap(#2) in place to stop any bolts falling in the tank when fitting assembly. VERY carefully lower the assembly into place. Loosely fit the M5 x 16mm (#7) countersunk bolts into position and tighten down. This will compress the Body to tank seal to the spout of the tank forming a fluid tight seal.
5. The fuel filler kit is now ready for use. NEVER over tighten the cap (#2). Only a gentle twist is needed for a positive seal. The O-Ring (#3) is there to prevent over tightening.

**N.B**

The seals are made from a special material called Viton which is designed for petroleum use. NEVER substitute these seals with anything else. DO NOT use with the O-Rings removed. SAFETY is of paramount importance. Please ensure this product is correctly fitted and tested before using you motorcycle.
